In order that any sight record or banding of a rare species can be confirmed for the historical record, it must be properly documented. LPBO cooperators are therefore asked to complete a form in every case where a rarity is being claimed. Guidance as to which species are considered rare in the Long Point area may be obtained from the LPBO Program Coordinator and in the Long Point Area Checklist found in *A Birding Guide to Long Point Area*. Each observer should prepare his/her description independently and preferably before consulting any field guides or other literature.

PLEASE PRINT.

Species claimed: Bewick's Wren

No. of birds: 1

Age: First basic; second-year

Sex: unknown

Date(s): April 25, 2013

Place: Tip of Long Point

Time(s) of Observation: 0800

Who first saw the bird(s): Richard Dobbins

Who first identified it: Richard Dobbins, Janice Chard, Mick Townsend, Bev McLeod, John Glazebrook, Mick Wright.

Other observers (names and addresses):

c/o LPBO PO Box 160, Port Rowan, ON. N0E1M0

Any who disagree: No

Your previous experience with the species: None.

Circumstances:

Bird was captured as a part of the Long Point Bird Observatory Migration Monitoring Program. This is the 7th one banded at LPBO, but the first since 1982, and the first record for Long Point region since May 1, 1997.

Description:

Give separate description for (a) in the field (b) in the hand. Include full measurements and wing formula with hand descriptions. Include reasons for the elimination of other species.

Photos courtesy Janice Chard.

Banding Details:

Band Number: 2511-64835

Age: First alternate - second-year

Sex: unknown

Wing: 55

Weight: 10.5g

Fat: 2

Bander: Janice Chard

Finally, is this record 100% certain? Yes

Signed:

For the observers.
